

Setting up AI

NVIDIA JETSON

Content

- Discussion about some useful libraries
 - OpenCV, PyTorch etc.
- Installing **Python** and other supporting libraries
- **OpenCV** installation with **CUDA** support
- **PyTorch** and **TorchVision** Installation

Open Source Computer Vision (OpenCV)

- Open source library for **Computer Vision** problems
- First released in **2000**
- Over 2500 algorithms (**classic + state-of-the-art**)
- Enabled with **CUDA** Support
- Latest version available is **4.5.4**

PyTorch

- Powered by **Facebook**
- First released in **September 2016**
- Most popular **Deep learning** library
- Easy to use as compared to **TensorFlow**
- Allows to customize the **low-level** functions

TorchVision

- Part of **PyTorch** designed for the **Computer Vision** tasks
- Comes with **GPU** support.
- Contains many popular image **Datasets**
 - **MNIST, CIFAR, COCO, ImageNet** etc.
- Contains several **pre-trained models**
 - **ResNet, Inception, GoogleNet** etc.
